DISTRIBUTION STATEMENT A.

Approved for public release; distribution is unlimited.

CONTENTS

This publication is composed of three parts. The first part lists standardization projects in Federal Supply Class (FSC) sequence. The second part is in preparing activity symbol sequence. The third part lists, in FSC sequence, projects that propose cancellation of a standardization document.

INSTRUCTIONS FOR FILLING OUT AND SUBMITTING
STANDARDIZATION PROJECT TRANSMITTAL SHEET
(DD Form 1585)

A. GENERAL

Standardization Project Transmittal Sheets (DD Forms 1585) are used to introduce planned standardization projects and to report initiation, completion, cancellation or other status change of existing projects (see Figure 1). These forms, when completed, contain information generated by preparing or adopting activities to keep lead standardization activities (LSAs) apprised of status of projects within their FSC/area of responsibility. Information contained in these transmittal sheets is the basis for compiling and updating the SD-4. Report Control Symbol DD-P&L(AR)759 has been assigned to this reporting requirement.

B. GENERAL INSTRUCTIONS

The preparing or adopting activities are responsible for preparing and submitting completed DD Forms 1585 to the LSA in a timely manner. Preparing or adopting activities must send a copy of each DD Form 1585 to the Defense Printing Service Detachment Office, 700 Robbins Avenue, Building 4D, (NPM-DODSSP), Philadelphia, PA 19111-5094. When applicable, copies of the DD Form 1585 should also be sent to the Custodians and the General Services Administration (GSA) see SD-1 for addresses).

C. PART A

Establishing a new project:

Initial entry must contain an N in column 80. Enter data for all applicable columns (col) on the initial submission to establish a new project.

Updating an existing project:

Subsequent entries require matching data in project number (col 1-10), preparing activity symbol (col 51-52) and a transaction code U (col 80). Data in col 11-50 and 53-79 is retained from original entry and is not required for updates. The 80 columns are comprised comprised of 18 fields divided by lines, i.e., title (col 11-50), actual start

A-1	

(col 62-64), status (col 71), Army custodian (col 72-73), etc. To change data all columns within a field must be completed (i.e., to correct the title field, re-input the complete title). An update to indicate an actual completion could be accomplished by using col 1-10, 51-52, (68-70 only if estimated date is not actual date), 71 and 80. To change all data in a field to blank spaces, enter an X into each column of that field; applicable only to agent, policy, plan and custodian fields.

Detailed instruction for preparing DD Form 1585, Part A, are as follows:

1. Project Number, Columns 1-10: Enter assigned project number. Enter the first number or letter in column 1 and enter succeeding numbers or letters in columns 2-8 (5925N023 or MISC1234). Use columns 9-10 for sub-project numbers only (5925N02301). For sub-project numbers from 1 through 9 enter a 0 (zero) in column 9 (do not leave blank, do not use a dash). The project number is required data for all transactions.

2. Project Title, Columns 11-50:

(a) Enter the project title (left justified) in columns 11-50. Starting with column 11, include the document identifier number (the number will include the revision or the amendment or supplement number/letter as it appears in the DODISS), followed by the document title. Proposed new documents are not assigned document numbers, therefore, enter MIL, MIL SD, MS, A A, etc., as applicable, followed by three (3) X's. Annotations such as AMEND, Rev, New, etc., are unnecessary, see col 56. Only alpha and numeric data will be included in columns 11-50. The columns will be left blank rather than contain punctuation (-,/etc.) or special characters.

(b) For engineering practice studies, enter EP STDY followed by the title (left justified) in columns 11-50.

(c) For item reduction studies, enter IR STDY followed by the title (left justified) in columns 11-40; enter the number of items to be reviewed (right justified) in columns 42-45 and enter the estimated number of items to be

eliminated (right justified) in columns 47-50. Leave columns 41 and 46 blank. Leave blank all unused columns within columns 42-45 and 47-50. Do not enter zeros (0) in unused columns.

(d) Data in the title field is required for new (N) transactions.

3. Preparing or Adopting Activity, Columns 51-52: Enter in columns 51-52 the symbol of the preparing or adopting activity as shown in the SD-1. The preparing or adopting activity is required data for all transactions.

4. Agent Activity, Columns 53-54: Enter in columns 53-54 the symbol of the agent as shown in the SD-1. If not applicable, leave blank.

5. Basis Code, Column 55: Enter in column 55 the most applicable code that identifies the reason for establishing the project. (In the event of conflict due to multiple reasons for a project and code "D" is one of the reasons, code "D" is to be considered predominant.) A basis code is required data for new (N) transactions.

<u>Code</u>	<u>BASIS</u>
A	Advancements in technology, methods or practices
B	Needed for imminent acquisition
C	Editorial correction, reinstate omitted material, correct errors
D	Overage document review
E	Study to reduce item inventory
F	Requested for other reasons (e.g., feedback from DD Form 1426, change to user requirement, direction of higher authority, special emphasis product, etc.)
G	Requested to serve as military coordinating activity (MCA) on GSA/USDA prepared document/study. (The MCA is identified as the preparing activity in columns 51-52).

6. Action Code, Column 56: Action codes identify the type of action being taken on a specific document. Because Item Reduction and Engineering Practices studies may not be related to an individual document, action code 3 should be used for studies. Enter in column 56, the applicable type of action code. An action code is required data on new (N) transactions.

<u>Code</u>	<u>Type of Action</u>
1	Amendment, page revision
2	Revision of standardization documents
3	Item Reduction or Engineering Practice Study
4	New Document
5	Notice (e.g., adoption notice for a non-government standard, cancellation notices, notice of inactivation for new design, etc.)

7. Policy Impact Code, Column 57: Because special attention is focused on new policies or recent policy changes, it is often necessary to identify those projects implementing these policies. Column 57 will be used to indicate whether or not the project is the result of one of the special interest areas listed below. The codes should be considered dynamic, i.e., as new areas of interest occur, new codes may be added; as the impact effectiveness or implementation of the policies is determined, codes may be eliminated. If not applicable this column should be left blank. If chlorofluorocarbons or halons are being eliminated, Code J shall apply and take precedence over any other policy impact code.

<u>Code</u>	<u>Policy Impact</u>
A	Commercial Item Description or reduction of government unique requirements
B	Nongovernment standard participation
C	Metrication
D	International standardization agreement
E	Resource conservation
F	Toxic materials
G	Energy conservation
H	Part numbering
I	Acquisition streamlining
J	Chlorofluorocarbon/halon elimination

8. Program Plan Related Code, Column 58: This column is used to identify standardization projects which are identified in a current standardization program plan (FSC or AREA). For projects so related, insert a P in column 58. If the project is not identified in a program plan, leave column 58 blank.

9. Schedule, Columns 59-70:

(a) The schedule should indicate the best estimate of planned start and completion dates. For SD-4 purposes, standardization document projects start when writing of the draft document begins, i.e., after the results from engineering and marketplace analysis are known and technical

data are available. For engineering practice studies, standardization projects start when engineering/technical resources are dedicated to the generation of data. For item reduction studies, standardization projects start after it has been established that the benefits outweigh the costs of conducting the study and the project title data (col 42-45 and 47-50) has been determined. Project completion is the date that the document or study is approved and dated. As a rule, standardization projects should take no longer than two years (eight quarters) to complete. LSAs should carefully review the extenuating circumstances of projects scheduled to take longer than eight quarters to complete prior to assigning a project number. Projects should be entered into the SD-4 without undue delay after project number assignment.

(b) To improve the accuracy of schedule dates, certain controls are placed on data entries. Identify only those projects that are planned to start (X status) within eight quarters from the date the DD Form 1585 is submitted. It is not required to identify a planned completion date (col 65-67) until the project is actually started. If, however, a planned completion date was identified for a planned project during Z status, the date can be changed when project actual start date is submitted. The planned start date and actual start date cannot be changed once entered. The planned completion date cannot be changed once the project has been placed in "active" status (A in col 71).

(1) Planned Start Date, Columns 59-61: These columns represent the best estimate of a project start date. Once entered, this date cannot be changed. Enter in columns 59-60, the last two digits of the Fiscal Year and in column 61, the number of the Fiscal Quarter in which the planned (future) project is expected to be started. For example, January 1996 would be recorded as 962. The date should be less than two calendar years (eight quarters) from the date of DD Form 1585 submission. Establishment of a planned start date in the SD-4 is optional. An entry in col 59-61 requires a Z in col 71.

(2) Actual Start Date, Columns 62-64: These columns represent the date the project actually started. Once entered, this date cannot be changed. Enter in columns 62-63, the last two digits of the Fiscal Year and in column 64, the number of the Fiscal Quarter in which the project actually started. For example, October 1993 would be recorded 931. An entry in col 62-64 requires an A in col 71.

(3) Planned Completion Date, Columns 65-67: These columns represent the best estimate of the project completion date at the time the project was started. It is not necessary to enter a date in this column for planned

projects. Upon project start, however, this date must be identified and cannot be changed. Enter in columns 65-66, the last two digits of the Fiscal Year and in column 67, the number of the Fiscal Quarter in which the project is realistically expected to be completed. Unless there are significant extenuating circumstances, the planned completion date should be less than two years (eight quarters) from the start date.

(4) Actual/Estimated Completion Date, Columns 68-70: These columns serve the double function of identifying the latest best estimate of project completion as well as the actual completion date. Upon project start, this date will be identical to the planned completion date. Because circumstances which affect the project may impact the project completion date, these columns should be revised whenever appropriate to display the most accurate and latest estimate of project completion. For example, a project which originally was scheduled to be completed in April 1993 (33) encounters coordination difficulty and is now expected to be completed in August 1994 (944). When the revised date is known, a DD Form 1585 should be initiated and forwarded to the DODSSP indicating in columns 68-70 that the estimated completion date has been changed to 944. When the project is officially completed, these columns will be updated to show the actual date that the project was completed. The initial entry in col 68-70 to indicate an estimated completion requires an A in col 71. The final entry to indicate actual completion requires a G in col 71. If an unavoidable, lengthy work stoppage occurs, and an accurate completion date cannot be determined, discontinue the project.

10. Status Code, Column 71: Enter in column 71, the applicable status code denoting the current status of the project from the following codes. Projects indicating G or Y status codes are listed in one issue of the SD-4 and then automatically deleted. The status code is required data for new (N) transactions.

<u>Code</u>	<u>Status</u>
A	Project initiated and work on project underway
G	Project completed (includes Simultaneous Initiation and Completion (SI&C) for notices, amendments to LC documents, etc.) SI&C projects being entered in G status on the initial entry, must also include dates in columns 62-70.
Y	Project discontinued
Z	Project to be initiated (planned project)

11. Custodians, Columns 72-79: Enter in columns 72-73 for Army; 74-75 for Navy; 76-77 for Air Force, and 78-79 for DLA, DNA, NASA, etc., the symbols of applicable custodians as shown in the list of DOD Standardization Activities and Other Interested Activities in the SD-1.

12. Transaction Code, Column 80: Enter in column 80 the applicable transaction code shown below. A transaction code is required data for all transactions

<u>Code</u>	<u>Transaction</u>
N	New Project being established (initial submission)
U	Update to an existing project (all subsequent submissions)

D. PART B

The type of action involved with a DD Form 1585 shall be indicated in PART B. If neither project initiation, completion, nor discontinuance is applicable, the "other" block should be checked and the appropriate action specified (e.g., SI&C; correction of error, change to estimated completion date, etc.).

E. PART C

When the DD Form 1585 is the initiation notice, PART C shall contain a statement regarding the scope and purpose of the project. When the DD Form 1585 discontinues a project, the reason will be stated. When the DD Form 1585 is submitted to change the estimated completion date or discontinue a project, PART C shall contain a statement of rationale for the modification.

CONDITION CODE

<u>CODE</u>	<u>DESCRIPTION</u>
A	Project not started as scheduled.
B	Project not completed as scheduled.
C	Project not completed as scheduled and estimated completion date has passed.
D	Estimated completion is next quarter.
